SUMMARY

Information Systems Engineering graduate and .NET Developer with 5 years of academic and professional experience building APIs, internal tools, and desktop/web applications using C#, .NET, ASP.NET, SQL Server and React. Interested in backend roles focused on scalable, performance-oriented software and business systems.

SKILLS

Languages & Frameworks: C# , C++, SQL, .NET, ASP.NET, Entity Framework, Windows Forms, HTML, CSS, React

Tools & Concepts: Git, Postman, SQL Management Studio, UML, Software Architecture, OOP, REST APIs, Desktop Applications, Operating Systems, Low-Level Development, Optimization and Refactoring

WORK EXPERIENCE

Freelance Web Developer | Freelance

Dec 2025 - Jan 2026

- Developed and maintained a website for a growing local business. Gathered and analyzed requirements, designed website features and implemented solutions using HTML, CSS and JavaScript.

Software Developer (.NET) | Scania Industrial Plant Tucumán (Intern)

Jun 2024 - Nov 2025

- Designed and developed APIs and desktop applications to support manufacturing and operational workflows, using .NET, ASP.NET, and SQL Server.
- Built and optimized internal libraries that improved development efficiency and code maintainability across multiple systems.
- Collaborated with the development team to define coding best practices and improve software quality across production-focused applications.

Video-game Developer | Deathmoon Studio (Intern)

Feb 2018 - Abr 2018

- Software development, 3D modeling and level design for the video-game *Revolución*, using Unity, C# and Blender.

PROJECTS

Manufacturing Execution System | ASP.NET, Windows Forms, SQL Server

- Contributed to the design and development of a large-scale Manufacturing Execution System (MES).
- Implemented new features and complex adaptations to support its implementation across additional manufacturing processes.

Real-Time Communication Tools | .NET

- Redesigned an internal real-time communications library to improve its maintainability and scalability, reducing the original project's size in approximately 90%.

Quality Control System | ASP.NET, SignalR, Windows Forms, SQL Server

- Developed frontend and backend components for a distributed system supporting factory quality control processes.

EDUCATION

2018 - 2025 **Information Systems Engineer** | Universidad Tecnológica Nacional

LANGUAGES

Spanish | Native

English | C1 (CEFR) - Cambridge English Level 2 Certificate in ESOL International (First)
